

AEOS KERNEL ARCHITECTURAL SPECIFICATION - REVISION 2.4

Process control blocks govern preemptive time slicing and memory isolation.
To avoid resource starvation, priority queues enforce round-robin scheduling.

```
``typescript
export interface SandboxConfig {
  Memory: 1073741824;
  NanoCpus: 1000000000;
  NetworkMode: 'none';
}
``
```

Parameter	Allocation	Isolation Mode
RAM_CAP	1024 MB	Hard Cgroup
CPU_SHARE	1.0 Core	CFS Quota
